

critical speed of shafts pdf

1.0 Abstract: - Maintenance of Critical Equipments for Coal Handling Plants (CHP) of Thermal Power Stations is typical job. The failures of these equipments have led to high maintenance and

Critical Equipment Maintenance

A typical line shaft would be suspended from the ceiling of one area and would run the length of that area. One pulley on the shaft would receive the power from a parent line shaft elsewhere in the building. The other pulleys would supply power to pulleys on each individual machine or to subsequent line shafts.

Single suction two-screw pumps The TUSHACO® two-screw pump is a rotary, self-priming positive displacement pump. The basic pump design is an overhung, single suction machine for low to moderate flow rates. The inboard ends of the two pumps' shafts are supported by a robust bearing frame.
