Bamshad Mobasher - DePaul University

Intelligent design (ID) is a pseudoscientific argument for the existence of God, presented by its proponents as "an evidence-based scientific theory about life's origins". Proponents claim that "certain features of the universe and of living things are best explained by an intelligent cause, not an undirected process such as natural selection." ID is a form of creationism that lacks empirical ...

Intelligent design - Wikipedia

Human intelligence is the intellectual power of humans, which is marked by complex cognitive feats and high levels of motivation and self-awareness. Intelligence enables humans to remember descriptions of things and use those descriptions in future behaviors.

From Table 1, it can be observed that these concepts have been widely studied and implemented. They share some similarities, such as the aims of intelligent/smart decision-making in manufacturing systems and the optimization of various manufacturing resources. Several technologies, such as the IoT, cloud computing, and BDA, are used within these three main concepts.

The first annual "Humies" competition was held at the 2004 Genetic and Evolutionary Computation
Conference (GECCO-2004) in Seattle. Entries were solicited for cash awards for human-competitive results
that were produced by any form of genetic and evolutionary computation and that were published in the open
literature during previous year.

Human-Competitive Awards 2004 – Present

Sewell's treatise briefly presents two overarching perspectives in science: (1) a mathematical analysis of the
modern synthesis of biological evolution and (2) a canvas of some of the principles of science that are
applied by advocates of intelligent design.
