Machine learning (ML) is a category of algorithm that allows software applications to become more accurate in predicting outcomes without being explicitly programmed. The basic premise of machine learning is to build algorithms that can receive input data and use statistical analysis to predict an output while updating outputs as new data becomes available.

Precursors. The dream of artificial intelligence was first thought of in Indian philosophies like those of Charvaka, a famous philosophy tradition dating back to 1500 BCE and surviving documents around 600 BCE. McCorduck (2004) writes "artificial intelligence in one form or another is an idea that has pervaded intellectual history, a dream in urgent need of being realized," expressed in ...
