

mathematical perspectives on neural pdf

normalization may be the mark [65]. Nevertheless, the speculative explanation given in [33] has been repeated as fact, e.g. in [60], which states, "it is well-known that a deep neural network is very

Troubling Trends in Machine Learning Scholarship

Artificial intelligence (AI), sometimes called machine intelligence, is intelligence demonstrated by machines, in contrast to the natural intelligence displayed by humans and other animals. In computer science AI research is defined as the study of "intelligent agents": any device that perceives its environment and takes actions that maximize its chance of successfully achieving its goals.

Deep learning (also known as deep structured learning or hierarchical learning) is part of a broader family of machine learning methods based on learning data representations, as opposed to task-specific algorithms. Learning can be supervised, semi-supervised or unsupervised. Deep learning architectures such as deep neural networks, deep belief networks and recurrent neural networks have been ...

Awesome - Most Cited Deep Learning Papers [Notice] This list is not being maintained anymore because of the overwhelming amount of deep learning papers published every day since 2017.

GitHub - terryum/awesome-deep-learning-papers: The most

Finally, a book about a technical subject that contains all the necessary math to understand what the author is talking about. There has been a long, long pause between the late-1980s work on neural networks and AI and some grand "unified theory" to connect the two into some reasonable explanation of how the human mind works.

How to Build a Brain: A Neural Architecture for Biological

In recent years, deep artificial neural networks (including recurrent ones) have won numerous contests in pattern recognition and machine learning.

(PhysOrg.com) -- The concept of time as a way to measure the duration of events is not only deeply intuitive, it also plays an important role in our mathematical descriptions of physical systems.

Scientists suggest spacetime has no time dimension - Phys.org

While the causes behind these patterns are uncertain, possibilities include the rapid expansion of the community, the consequent thinness of the reviewer pool, and the often-misaligned incentives between scholarship and short-term measures of success (e.g. bibliometrics, attention, and entrepreneurial opportunity).

Troubling Trends in Machine Learning Scholarship

Perhaps no aspect of mind is more familiar or more puzzling than consciousness and our conscious experience of self and world. The problem of consciousness is arguably the central issue in current theorizing about the mind.
