Neoclassical economics is an approach to economics focusing on the determination of goods, outputs, and income distributions in markets through supply and demand. This determination is often mediated through a hypothesized maximization of utility by income-constrained individuals and of profits by firms facing production costs and employing available information and factors of production, in ...

Theory of the firm: Managerial behavior, agency costs and

The theory of consumer choice is the branch of microeconomics that relates preferences to consumption expenditures and to consumer demand curves. It analyzes how consumers maximize the desirability of their consumption as measured by their preferences subject to limitations on their expenditures, by maximizing utility subject to a consumer budget constraint.

Repeated behavior has been shown to form habits (Verplanken 2006). In the context of M-shopping, we posit that mobile technology is a superior platform for a firm to engender habitual interaction from its customers because mobile devices themselves are an integral part of the customer’s daily routines.
